

Letter from the Desk of Editor's

It gives me immense pleasure to write the Inaugural Editorial. The Idea of Coming up International Journal of Pharmaceutical Research was planned few months back with all different sought of ideas coming up in my mind. Finally we are coming up January 2018 issue with the aim to promote research activities around the globe and contribute best possible articles to the existing literature.

The Idea came up in our mind, when we observed that the world in which we are living has tremendous scope research and several people are also actively involved in it. but it was annoying to see that today's young generation(Pharmacy Students) are not involved actively. They would have been the frontrunner and future lies within their hand.

There are thousands of medical and pharmacy students passing out every year, but hardly even around 10% of them would have got involved in any scientific projects or published research papers. Hence, we came up with idea to start with International journal of Pharmaceutical Research, which would provide platform for medical and pharmacy students, research lovers and professionals to publish their research publications. In time, the IJPR will become a recognized forum for learning and exchange of ideas by and for medical and Pharmacy professionals not only in India, but throughout the globe.

We encourage the new generation of health professionals to create and publish new research data in this journal and adopt critical thinking habits to address health problems which we face in our routine life. This journal will encourage international research collaborations that result in joint publications of high international standards.

Articles in the following categories are welcome: Original Research, Reviews, Editorials, and Letter to Editor, Rare Clinical Cases, and Lessons from Practice, Diagnostic dilemma, View point, Opinion, Hypothesis, Medico-Legal issue, etc.

Finally I would like to thank my colleague and Editor In Chief of this journal Dr.Dhiren P Shah and all Editorial Board members, who have taken all possible efforts to come up with the Jan -2018 issue and hope this journal has a great future with providing a perfect platform for research publication.
